Studded Insulation Panel

naturally better

Studded Insulation Panel

Insulation = energy saved...

Along with excellent insulating properties, the studded insulation panel is a lightweight, durable product designed to hold hydronic piping in place over an existing flooring. The benefits are an energy efficient and quicker reacting

underfloor heating system compared to conventional slab heating, with the capacity for individual room control offering flexibility and energy savings.

| Description | Technical Details |
|----------------------|---|
| Panel size | 1200 x 800 x 55 mm |
| Thermal Value | R Value 1.00 |
| Density | 30kg/m ³ |
| Compressed Strength | 160kPa @10% deformation |
| Cross break Strength | 260kPa min |
| Pipe sizes | 16, 18 & 20mm OD |
| Material | expanded flame retardant polystyrene |
| Concrete Screed | 20-50mm depth over pipe* *depending on flooring choice over screed |
